HOLLINGSWORTH FROM DARKHORSE LIGHTWORKS EARNS WELL ACCREDITED PROFESSIONAL (WELL AP) CREDENTIAL

(LOS ANGELES, FEB 9, 2018) – Dawn Hollingsworth, Principal of Darkhorse Lightworks has earned the WELL Accredited Professional (WELL AP™) credential through the International WELL Building Institute™ (IWBI™), placing her among a group of leading professionals who are dedicated to supporting human health and well-being in the built environment.

The WELL AP credential is the new, leading credential signifying advanced knowledge of health and well-being in the built environment and specialization in the WELL Building Standard™ (WELL).

WELL APs have successfully passed the WELL AP exam, an assessment based on the expertise of leading practitioners in the field of design, health and wellness in the built environment. Developed using GBCI's rigorous test development best practices, the WELL AP exam is designed to test a candidate's knowledge and proficiency in building wellness and the principles, practices and applications of the WELL Building Standard. The WELL AP Exam was launched last October and was complemented by a comprehensive educational program.

"I am very excited about the WELL Building Standard and have committed my practice to promoting and designing lighting systems to benefit people. Improving lighting systems in the built environment is one of the best investments any company can make to improve the well-being of their employees" commented Hollingsworth.

The WELL Building Standard is the first building standard to focus exclusively on the health and wellness of the people in buildings. WELL is an evidence and performance-based system for measuring, certifying and monitoring features that impact human health and well-being in the built environment, through air, water, nourishment, light, fitness, comfort and mind.
